Introducing Commercial Sized DIRTCAL Dirt Separator Line Expansion

What's New?

Caleffi is pleased to announce a new addition to its proven DIRTCAL family of dirt separators for corrosion protection and better performance in hydronic piping systems. The new 5465 series models, specially designed for commercial hydronic systems, are made from fabricated high strength steel with stainless steel internal element and coated with epoxy resin paint with a stainless steel internal element. They are rated for 150 psi working pressure and 250°F maximum operating temperature. Available with ANSI raised-face flanges in 2" to 6" sizes, they are designed for flow rates ranging from 37 to 376 GPM at 4' per second maximum fluid velocity. Models built in accordance with ASME Section VIII, Division 1 standards are also available.
